

License and Reuse

AI Governance Framework Series

Version 1.0

Copyright

© 2026 Jabreel Asghar

All rights reserved.

The **AI Governance Framework Series**, including all companion frameworks, text, figures, diagrams, tables, models, and supporting materials, is the intellectual property of the author unless otherwise stated.

Purpose of this Licence

The AI Governance Framework Series has been developed to support responsible AI governance in higher education through research, professional practice, and educational development.

The author encourages appropriate educational use while protecting the integrity of the framework series and its associated intellectual property.

Permitted Uses

The following activities are permitted without prior written permission, provided that appropriate attribution is given:

- Reading, downloading, and sharing the publications.
 - Using the frameworks for teaching, staff development, workshops, and professional learning.
 - Citing the frameworks in academic publications, theses, conference papers, institutional reports, and policy documents.
 - Incorporating the frameworks into institutional discussions, curriculum review, assessment design, and quality enhancement activities.
 - Printing copies for educational and non-commercial use.
-

Uses Requiring Permission

The following activities require prior written permission from the author:

- Commercial publication or republication.
 - Translation into another language for publication or distribution.
 - Modification, adaptation, or redistribution of the frameworks as derivative works.
 - Incorporation of substantial portions of the framework series into commercial training programmes, consultancy products, software, or proprietary educational resources.
 - Sale of printed or digital copies of the publications.
-

Attribution

When using or citing any part of the framework series, users should provide appropriate academic attribution to the author and cite the relevant framework or the series as a whole using the recommended citation format provided in the accompanying **Suggested Citations** document.

Appropriate attribution does not imply endorsement by the author.

Disclaimer

The AI Governance Framework Series is conceptual and practice-informed. It is intended to support educational practice, scholarly discussion, and institutional development.

The frameworks do not constitute legal advice, regulatory guidance, accreditation standards, or institutional policy. Institutions remain responsible for ensuring that local implementation aligns with applicable legislation, regulatory requirements, and institutional policies.

Future Editions

The framework series may be revised periodically to reflect developments in generative artificial intelligence, higher education assessment, academic integrity, and institutional practice.

Readers should ensure that they are consulting the most recent published version.

Contact

Requests relating to permissions, licensing, commercial use, translations, or other enquiries should be directed to the author through the official AI Governance Framework Series website.
