Responsible AI Governance for Higher Education Assessment

Framework Series Brochure

Version 1.0

AI Governance Framework Series

A Practical Framework for Responsible AI Governance in Higher Education Assessment

Artificial intelligence is reshaping higher education assessment, challenging long-established assumptions about academic authorship, authentic learning, transparency, and educational integrity.

The **AI Governance Framework Series** provides a coherent, educationally focused approach to these challenges. Rather than relying primarily on AI detection or misconduct procedures, the series supports responsible AI governance through assessment design, professional judgement, transparency, verification, and institutional implementation.

Developed for higher education, the framework series combines conceptual foundations with practical implementation tools that can be adapted across disciplines and institutional contexts.

The Framework Series

Framework	Purpose
1. From Assistance to Authorship	Conceptual foundation
2. AI-Integrated Assessment Integrity Lifecycle	Assessment governance
3. AI Disclosure Framework	Transparent AI disclosure
4. Oral Verification Toolkit	Educational verification
5. Assessment Authenticity Checklist	Assessment design
6. AI Risk-Level Matrix	Professional judgement
7. Institutional AI Governance Guide	Institutional implementation

Designed for

- University lecturers
- Programme leaders
- Assessment designers
- Educational developers
- Academic integrity professionals
- Quality assurance teams
- Institutional leaders
- Researchers

Figure 1: Architecture of the AI Governance Framework Series

Why This Series?

The framework series supports institutions in moving beyond fragmented responses to generative AI by providing an integrated educational approach to assessment governance.

Rather than focusing solely on technology, the frameworks emphasise:

- authentic learning;
 - intellectual responsibility;
 - professional judgement;
 - transparent AI use;
 - educationally meaningful assessment;
 - institutional consistency;
 - continuous enhancement.
-

Key Features

- ✓ Seven complementary frameworks
 - ✓ Practical implementation guidance
 - ✓ Assessment-focused rather than technology-focused
 - ✓ Suitable for institutional adaptation
 - ✓ Conceptual and practice-informed
 - ✓ Supports professional judgement
 - ✓ Designed for higher education
-

AI-Integrated Assessment Integrity Lifecycle

1. **Establish conceptual foundations**
 - From Assistance to Authorship
 - Assessment Integrity Lifecycle
2. **Strengthen assessment practice**
 - AI Disclosure Framework
 - Oral Verification Toolkit

- Assessment Authenticity Checklist
 - 3. **Support consistent decision-making**
 - AI Risk-Level Matrix
 - 4. **Embed institutional governance**
 - Institutional AI Governance Guide
-

Framework Status

The AI Governance Framework Series is **conceptual and practice-informed**.

It is intended to support educational practice, institutional implementation, scholarly discussion, and future empirical research.
